VOL. 7 NO. 39 · Lancaster Farming, Saturday, September 1, 1962 $2 Per Year

WINNERS IN THE 4-H Dairy show Thursday proudly display their animals. Top left with the champion Brown Swiss county group are, L to R, Donald Trimble, Gerald Kreider showing the heifer of Joyce Kreider, and Paul Trimble, all of Quarryville R1. Phyllis Hoover, Gap R1, was not present for the picture. At top right the Guernsey county group includes. L to R, Richard Ankrum, Peach Bottom; Suzanne Mumma, and Mary Ellen Mumma, Manheim, and Evan Lapp, Kinzers R1. In the lower left picture Marilyn Harnish, Quarryville R2; Judy Flory, Lititz R1; James Esbenshade, Quarryville R2, and Donna Eshleman, Elizabethtown, exhibit the champion Ayrshire group. The Holstein exhibitors with their champion group are lower right. They are, L to R, Averril L. Royer, 2025 Oregon Pike; Richard Shelly, Manheim R1; Lorae Harbold, and Robert Hoover, Denver R2. L. F. Photos

County 4-H Dairymen Win Honors

Two Grand Champions, one Reserve Championship, and four out of the five county-group championships supplied decorations for mantles as local 4-H youngsters furnished stiff competition Thursday in the 14-county Southeast District 4-H dairy show.

The FFA regional dairy show was held Friday at the Guernsey Sales Pavilion, but no results were available at press time.

Blossomelle Zsa Zsa continued her winning ways with Averril Lindel Royer 2025 Oregon Pike Lancaster, at the Halter. Zsa Zsa remained unbeaten in class competition as a two year old and went on to garner the Grand Championship of the Holstein classes, repeating her success in last year's district show.

Glenhurst Dixie Blossom brought a smile to the face of her owner, Marilyn Harnish Quarryville R2, as she collected her fifth Grand Champion rosette in the district show.

Both the Grand Champions led their respective breeds to the championship in the county groups of four animals. Teaming with Miss Royer were Richard Shelly, Manheim R1; Lorae Harbold, Elizabethtown, and Robert Hoover, Denver R2.

Judy Ann Flory, Lititz R1; James Esbenshade, Quarryville R2, and Donna K. Eshleman Elizabethtown R1, joined Miss Harnish and "Blossom" to bring the group championship to the Garden Spot.

The Reserve Champion of the Guernsey breed was Spring Locke N. Jewel, exhibited by Richard Ankrum, Peach Bottom. Combining with Suzanne and Mary Ellen Mumma, Manheim R1, and Evan Lapp, Kinzers R1, Richard led the county group to the championship in that breed.

Four of the first six Brown Swiss 4-H calves in Lancaster

(Continued on Page 16)

Drought Aid Requested By Farmers Here

The Lancaster County Disaster Emergency Relief committee met Thursday to approve the application for four farmers for drought aid.

The four may harvest grass for hay or pasture on land previously retired from production under the conservation reserve program, but the value of any forage removed from such diverted acres will be deducted from government payments to the farmer under the program.

The four farms, one each in Mount Joy, East Donegal, Martic, and East Lampeter Townships represent only a small fraction of the approximately 8,000 acres now under the program, according to Miss Dorothy Neel, Manager of the Lancaster Office of the Agricultural Conservation and Stabilization Committee.

Miss Neel said other farmers in the county will be eligible for reduced freight rates on hay as soon as the railroad companies receive certification from the Federal Gov. and that Lancaster County has been classified as a drought emergency area.

In order to take advantage of the reduced freight rates, farmers will need to get certification from the county ASC office that he will feed the hay to livestock on his farm.

Meanwhile, a five month extension of the period for reduced freight rates on hay shipped into drought disaster areas was reported this week by State Agriculture Secretary William L. Henning on his return from a special conference with U. S. Agriculture officials in Washington.

The 75 per cent rate on hay granted by eastern railroads was scheduled to expire October 31. It will now continue in effect until March 31, 1963, Secretary Henning said. The move was in line with the recent extension by the U. S. Department of agriculture in extending grazing and haying permits on reserve acreage in disaster areas from August 31 to November 15.

Farm Calendar

Sept. 5 - 8 p.m. Red Rose Baby Beef and Lamb 4-H Club annual beef barbecue in the Penryn Picnic woods.

Sept. 6 - 4:30 p.m. meeting of Lancaster County teachers of Vocational Agriculture meets at the Elizabethtown High School.

Sept. 8 - 11 a.m. - State Hampshire Sheep Field Day at Green Meadows Farms, Bareville.

DHIA Directors Plan Banquet

The Red Rose Dairy Herd Improvement Association decided this week to hold the annual banquet at noon again this year.

Up until last year the banquet had always been held during the evening, but because of the snow storm which kept the 1960 banquet attendance at a minimum, the directors voted to hold the meeting at noon on a trial basis for one year. Directors meeting Monday night at the Farm Bureau Building voted to continue the afternoon meeting because of the success last year.

The tentative date for the banquet was set for the week following the Pennsylvania Farm Show in January. The specific date will be announced after the committee has made final arrangements.

Three committees appointed by president Jason Weaver were Banquet place and meal committee, Banquet program committee and the committee to select the outstanding tester in the county.

Committee members were as follows: Banquet site, John Jacob Oberholtzer, Leoa, chairman; Irvin R. Musser, Mount Joy R1, and Hayes Hastings, Kirkwood R1. Banquet program, Paul Hess, Lititz R1, chairman, Robert Hess, Strasburg R1, and Elam Bollinger, Gordonville. To choose outstanding tester, Robert McSparran, Peach Bottom, chairman; Leon Summers, Gap R1, Graybill Gibble, Manheim R3, Charles Tindall, Peach Bottom and Kenneth Skiles, Narvon R2.

Wheat Vote Is Light: Negative

Lancaster County farmers Thursday continued true to form as they turned down national wheat quotas for the 10th time by a vote of 47 to 4 with six ballots being challenged at the polls.

Historically, farmers in the Garden Spot have rejected wheat quotas in every referendum, but they have been outvoted nationally as they were again this week.

In Thursday's voting only about 7.2 per cent of the 795 eligible voters turned out to cast ballots at the eight community polls, according to Miss Dorothy Neel, office manager of the Lancaster County Agricultural Conservation and Stabilization office.

However, the turnout was better than the 5.7 per cent of the approximately 2,800

(Continued on Page 4)

FIVE-DAY WEATHER FORECAST

Saturday-Wednesday

Temperatures during the next five days are expected to average more than seven degrees above the normal range of 60 at night to 80 in the afternoon. Very warm weather is expected to continue in the area through Saturday and Sunday with a cooling trend by Tuesday and Wednesday. Precipitation may total .1 to .5 inch of rain falling as scattered showers or thundershowers late Monday.

SHEEP 10. Not enough on sale to establish a market.

August 28 auction at New Holland sold at nearly steady prices, quality considered. Thirteen stock bulls and 11 stock heifers were also in the run

Fresh Holstein cows brought $275-$530 while Guernseys made $175-$225, and other breeds sold for $175-$285.

Stock bulls crossed the block at $110-$210 and stock heifers changed hands at $65-$130

At the August 26 sale of horses, ponies and mules, 259 head made up the run Prices continued about steady, but bidding was slow.

Pony mares brought $75-$125, and gelded ponies sold for $40-$140 Riding horses ranged $135-$385, and driving horses sold for $135-$250. Killer horses and mules were 8-8½ cents

The 438 hogs in the August 26 auction sold at about steady prices of 20-21 for retail hogs to local butchers, 19-20 for 1 to 3 grade, and 18-19 for fat hogs over 240 lbs. Eight shoats brought $13 per head

● Delmarva

Production Even Demand Good

Live broiler prices in Delmarva advanced slightly with a good demand for the moderate offerings during the 24 hour period ending 10 30 Friday morning

Prices ranged from 17 to 17 6 on 1,033,400 head at farms during the period

Estimated slaughter by Eastern Shore processors for the weekend was 693,000 head compared to the 763,000 head last weekend Practically no plants planned to operate today or Monday

The Delmarva boiler-feed ratio for the week ending August 24 was up two points to 3 7 Broilers during the week averaged 17 19 per pound and mash cost the grower $94 11 per ton. For the comparable week a year ago the ratio stood at 2 8 when broilers averaged 13 06 and mash cost $93 65.

● Fluid Milk

Slight Advance On Good Call

In the northeast the production of fluid milk was the same as the previous week in some instances to slightly increased in others.

Bottling demand ranged from light to good In New England hot, humid weather increased consumption while New York cities failed to take up the slack created by lighter demands from resort areas. Wholesale selling prices in metropolitan New York ranged $5 00 to $5 05 per 40 qt. unit of bottling quality milk. A few distressed sales at $4 95

From Where We Stand . . .

Some Kinds Even Taste Good

"No Daddy, not that one. Get the one with the space men on it."

It didn't matter to him what was inside the box. But he had to get the space men to complete the set.

Remember when you had only three or four kinds of cereal to choose from? You could get oatmeal, or cornflakes, or wheat flakes, or a wheat cereal that tasted a little like corn meal mush but really "stuck to the ribs" on a cold winter day. But most important they came in a box that told you on the outside what to expect on the inside.

Now the breakfast food boys put them in full color comic books, cut out castles, space ships, zoos, playhouses, cardboard records, coloring books and coupons for this and that

But inside things are even more fantastic!

You can still get the old flakes and meal — if you look hard enough between the stars, letters, wheels, granules, waffle shaped biscuits (spoon size), and little marble shaped objects that come in all colors — yet.

And the flavors - wow! !

You can get cereals that taste like raspberry, strawberry, orange, lemon and lime, vanilla and chocolate — and once in a while one that even tastes like corn. A little.

The kids are bombarded by propaganda about this cereal that is sugar sparkled, and that cereal that is shot through and through with sugar, and another that is sweetened with honey, till they think it is absolutely unpatriotic to think of sugaring your own breakfast food to your own taste.

But most of the kids never get beyond the container anyway when it comes to preference. They still eat what is put before them if they are hungry, or refuse to eat it if they happen not to be hungry

One cereal maker, realizing that kids are not the only ones who start out the day with something less than two fried eggs and a generous slice of ham, are trying to appeal to the intellectual types among us.

They are offering a cereal box with a message on the side

Now it is our belief that anyone who eats less than ham and eggs for breakfast is in no shape for a message that early in the morning. Personally we have about all we can do to get past the headlines of the morning papers—without looking for deep, thought-provoking missives on the side pannel of a cereal box

And sizes!

You can get giant economy size, the huge family size, and the large size. In a few instances you can even get a standard size, but they just do not make cereal boxes in small size Oh yes, there are small boxes, but they are not 'small' sizes, they are individual servings. It doesn't matter that most kids eat less than one pre-measured individual serving, and most adults would prefer to have a little heftier serving, the individual serving has to be used up or thrown out once it is opened. If it is not, the boxes soon begin to take up more space than the supply of potatoes and canned goods for the rest of the meals in the day.

Oh well, maybe we are getting past the rough and tumble cereal stage anyway.

Digestion, teeth and temper are not what they used to be. Guess we might as well say, "Pass the corn meal mush, Ma."

At least that's how it looks from where we stand.

Paid Promotions

To advertise or not to advertise.

A group of dairymen were discussing the role of the farmer in providing the markets for his products the other evening.

We sat and listened to both sides. Some thought the farmer had enough to do in producing the stuff without worrying about selling it, and we have to agree that producing farm produce is a full time job.

Others in the group argued that no other industry produces a commodity without making preparations for the sale of that commodity.

We had just read a report on some of the advertising budgets of national companies; and couldn't help interjecting here that some of the farmer's competitors are spending millions of dollars to sell their products to the public.

Last year one soft drink company spent almost $20 million to promote a product which is in competition with milk Two other soft drink companies had advertising budgets of over $10½ million and $6 million, and this does not count all the hundreds of little independent companies around the country with budgets of a few hundred or a few thousand dollars, nor does it include the manufacturers of other beverages who spend millions and millions to promote their products.

Of course some promotion of agricultural products on a national basis is being undertaken, but the budgets of these groups are pygmies among the giants of the advertising world.

The American Dairy Association and the Florida Citrus Commission are the two largest organizations dedicated to promoting farm products, but there are many, many farmers producing milk and citrus fruit and not contributing a penny to either of these groups.

We believe that the time is coming when the individual farmer will have to tax himself for the purpose of advertising if he hopes to compete for the consumer's dollar

At least that's how it looks from where we stand.

Wheat Vote

(Continued from Page 1)

eligible voters who cast votes last year when a change in definition of eligibility let many more county farmers qualify. But the vote in 1960, when only about 800 growers were eligible to vote, was still lighter when only 4 9 per cent turned out, but in both cases the vote was overwhelmingly opposed to controls for the crop.

The breakdown of votes by communities is as follows:

Community #1	Yes-0, No-19	Challenged ballots-1	
Community #2	Yes-1, No- 6	Challenged ballots-1	
Community #3	Yes-0, No- 1	Community #6	Yes-2, No- 4
Community #4	Yes-1, No- 5	Community #7	Yes-0, No- 3
Community #5	Yes-0, No- 3	Community #8	Yes-0, No- 6

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material. Ezra 1, 2 64-65, 70, 3, 7
Devotional Reading: Ezra 3 10-13

Foundations

Lesson for September 2, 1962

IT HAD been 50 years since the great Temple of Solomon was burned to the ground, and the beautiful objects of silver and gold, which were so famous, had been carted off as loot by the invaders from the Euphrates Fifty years is a long time. Men now with grey beards, 60 years old or so, had been young children when the city fell to Nebuchadnezzar But old people remember far-past events better than most young ones do; and the splendor of Solomon's temple was not to be forgotten.

Dr. Foreman

Foundations

But though not forgotten, Solomon's temple could not be replaced either. The first great public work undertaken by the returned exiles, who brought no wealth with them, was to begin the erection of a temple on the site of the old When the foundation was laid, the old men wept, because they remembered the magnificence of the old temple and realized that this would never look like that. But the young people shouted for joy, for they had never seen a temple at all And the young ones were right, for those foundations were to bear the weight of a temple that was destined to last as long as Solomon's, or even longer. It would become a center of religious life for thousands of worshippers. Its successor, even if a king built it (and a king did), would never be loved as this one would be Incidentally this became the temple where our book of Psalms was first used as a hymn book.

But it all began with the foundations. All foundations look about alike; and they don't look like much. It takes imagination to see a shrine for God rising above the dusty rock of the foundations.

Foundations of Life

All this might suggest to us a parable. Saint Paul once called Christians a temple of the Lord, so we may apply his parable to ourselves. All lives are built on foundations of some kind. Jesus spoke of two houses, perhaps just alike except that one was built on rock and the other one built on sand. Foundations may be out of sight, indeed have to be out of sight if they go down far enough to do some good. Scaffolding is necessary but temporary; foundations are necessary from first day to last. Each human life is built on other lives. The kind of home which a father and especially a mother make, the kind of care they give their children, the spirit of the home, the faith and hope and love of that home, are a foundation on which a good life can be built. A home where there are doubt and hopelessness and hate, a home from which the children escape as soon as they possibly can, is a foundation for the life of a criminal or a beatnik. The probation officer of a large city said that all kinds of juvenile delinquents, with all sorts of backgrounds, had come under his eye; but never yet had he seen a juvenile delinquent from a home where husband and wife lived in harmony

On What Shall A Nation's Walls Be Set?

Nations like persons have foundations, good or bad. People sometimes wonder if we deceive ourselves when we prefer a democratic state to any other kind. Looking at other experiments in democracy, with the exception of the northern European nations, so-called democracies will not seem very attractive. Is there anything special about American democracy (which is a child, or a first cousin, of the democracies in northern Europe just mentioned)? Yes, there is, and this should be said in thankfulness and without pride, for we had nothing to do with it. There was a long, long period of growth, of trial and error, of practice, you might say, in democratic processes, before we started it over here. We blame the Congolese for making a mess of their country the minute they reach freedom. But would we have done any better with our nation if we had had no foundations? And it should not be forgotten that a corner-stone of our foundation is a long-time faith. "In God we trust" as a motto is worth little; as a foundation it is indispensable.

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

TO INCREASE MINERAL FEEDING

Livestock that are being fed on limited legume hay rations, or roughage of low quality, should get additional amounts of minerals. This might mean the use of 40 to 50 pounds per ton of dicalcium phosphate or steamed bonemeal In addition it is advisable to provide free choice of minerals to the herd

TO ADJUST PROTEIN LEVELS IN GRAIN RATION

Dairymen that are feeding low quality roughages, and especially those who are using only low quality silage as roughage should increase the protein content of the grain ration, in some cases a protein level as high as 30% (crude protein) should be used Without good legume hay or silage this extra protein is needed.

TO USE SODIUM METABISULFITE ON CORN SILAGE

When ensiling stunted corn research work has discovered that the use of 8 pounds per ton of sodium metabisulfite will reduce the formation of silo gas, preserve Vitamin A activity (carotene) and aid in the preserving of the low-quality corn crop.

TO SEED WINTER WHEAT FOR PASTURE

ter wheats may be seeded during late August and early September and used for grazing later this fall and early next spring These two varieties are resistant to Hessian fly trouble and should give some good forage. The use of a complete fertilizer at seeding time will give more rapid growth.

TO APPLY LIME THIS FALL

Grain fields that are to be

DHIA RECORDS TELL SUCCESS STORY

MILK PRODUCTION UP 1441 lbs.

BUTTERFAT UP 82 lbs.

Reprinted From
"THE GOLDEN GUERNSEY NEWS"
July 1962 Issue

The Guernsey herd of Francis and Ethel Kirk, Peach Bottom, Pa., has certainly shown a tremendous amount of improvement the last two years. Last year, on DHIA test, the herd increased 1441 lbs. of milk and 82 lbs. of fat, and this year, in the first seven months, the herd average has increased another 40 lbs. of fat. Foregoing any change in the present production, the herd should finish with well over 10,000 lbs. of milk and over 500 lbs. of fat. Their young sire, Carroll's Rob, has been one of the big reasons for this tremendous improvement. He was bred by Lloyd Balderston III, Colora, Maryland.

FRANCIS and ETHEL KIRK say . . . .

. . . we're convinced that Farm Bureau's DARI-PAK PELLETS make more milk and they are economical, too. Our income over feed cost is UP $46.00 per cow over last year. Our cows really go for those pellets. They clean them up quickly and completely — no feed waste or spoilage here. The Grain Exchange Program, which gives us FULL RETAIL PRICE for our home grown grain, is a great thing. In short, we're more than pleased with the Farm Bureau Dairy Feeding Program.

We at FARM BUREAU say . . . .

Francis and Ethel are milking a fine herd of "68" Guernseys. Their excellent breeding program and terrific management have played the key roles in their success. As mentioned in the Golden Guernsey News, they have an outstanding young sire, Carroll's Rob, who has proved to be a real asset. Of course, we're mighty proud that Farm Bureau's DARI-PAK PELLETS, carefully formulated and balanced with the proper milkmaking nutrients, helped the Kirk's accomplish their very excellent record.

Overseas Shipments Take Pa. Eggs

HARRISBURG -- The first shipment of shell eggs for United States troops in Europe left Pennsylvania last week in a test which could provide a major outlet for the state's $100,000,000 egg industry

State Agriculture Secretary William L Henning said the 9,000-dozen lot was trucked from Twin Valley Farmers Exchange at Hegins, Schuylkill County, for shiploading near Williamsburg, Virginia, today

Henning said federal Agricultural Marketing Service officials had advised him that a sucessful test could result in switching from local European procurement to stateside shipment of the militaries monthly needs of 95 carlots, each containing 600 30-dozen cases

"The tentative requirement that eggs be no more than 10 days old at dockside arrival for shipment puts the Eastern egg states in a preferred position," Henning said "If Pennsylvania producers and shippers were able to capture this new outlet, it could account for more than seven per cent of our normal production"

Henning pointed out that test shipments were being accepted only from marketing agencies which have full-time resident service under the federal-state grading agreement in order to certify the 10 day age maximum He urged that Pennsylvania shippers check with grading officials in Harrisburg to see if they can qualify for service

BABCOCK ANNOUNCES ASSOCIATE HATCHERY

Late Summer Desserts

By Mrs. Richard C. Spence

When summer-fresh fruits are at their prime, they deserve to be eaten just as is — or in the very best dessert you can bring to your table

Peaches, juicy and golden, fall in this category at present An uncomplicated dessert that is nonetheless mouthwatering is Fresh Peach Crisp. This glamorous bread pudding sandwiches a layer of sliced peaches between a crisp mixture of corn flakes, bread cubes, butter, sugar and spices. Dish the pudding up streaming, then pass a pitcher of cream to pour over each serving.

FRESH PEACH CRISP

½ cup soft butter or margarine
1 cup sugar
2 eggs
½ teaspoon nutmeg
½ teaspoon vanilla flavoring
1-½ cups toasted small bread cubes
2 cups corn flakes
4 cups sliced, peeled peaches
1 tablespoon lemon juice

Blend butter and ½ cup sugar thoroughly; add eggs and beat well. Stir in nutmeg, vanilla, bread cubes and corn flakes Place half of mixture in buttered 10 x 6 x 2-inch baking dish; spread peaches evenly over top and sprinkle with lmeon juice and remaining ½ cup sugar; cover with remaining corn flake mixture. Bake in moderate oven (375 degrees) about 20 minutes or until peaches are tender Serve with cream, if desired. 6 servings.

* * *

Peaches also appeal in a frosty dessert, Frozen Peaches and Cream. Prepared in a refrigerator tray, the dessert has a crust of packaged corn flake crumbs, sugar and butter. Crushed peaches lend their goodness to the creamy filling in which they are blended with melted marshmallows and whipped cream. The dessert may be cut in bars or wedges to serve.

FROZEN PEACHES AND CREAM

2 cups corn flakes or ½ cup packaged corn flake crumbs
2 tablespoons sugar
3 tablespoons soft butter or margarine
2 tablespoons orange juice
½ pound regular or miniature marshmallows
1 cup crushed fresh peaches, drained
1 cup heavy cream, whipped

If using corn flakes, crush into fine crumbs. Combine corn flake crumbs, sugar and butter; mix well Press evenly and firmly in the bottom of 1-quart ice cube tray, reserving 2 tablespoons crumb mixture for topping, if desired. Chill

Heat orange and lemon juices in medium-size saucepan to the boiling point. Add marshmallows, reduce heat and stir until marshmallows are melted. Cool slightly. Stir in peaches. Fold in cream. Pour into crumb crust. Sprinkle with reserved crumbs. Freeze 3 to 4 hours. 6 servings.

* * *

Fresh nectarines or peaches and dark pitted cherries combine delightfully with vanilla ice cream into a ripple that's certainly different than the ice creams your neighbor serves. Next time she stays for dessert, be sure to have this recipe ready in the freezer.

ICE CREAM FRUIT RIPPLE

2 cups (16-ounce can) dark pitted cherries
1 tablespoon cornstarch
¼ teaspoon salt
2 cups sliced fresh nectarines or peaches
¼ cup sugar
1 quart vanilla ice cream

Drain cherries, reserving juice, and cut in half. Set aside. In a saucepan, mix cornstarch with a few tablespoons of cherry juice to form a paste. Stir in remaining juice and salt, cook, stirring constantly, until mixture boils. Cool. Chop the sliced nectarines or peaches and add sugar. Cover the bottom of a 2-quart container with scoops of ice cream and top generously with the fruits and syrup. Continue to fill pan with alternate layers of ice cream and fruits Pack down firmly with back of spoon, cover and freeze. 8-10 servings.

* * *

PEACH CHIFFON PARFAIT

1 3-ounce package orange flavored gelatin
1 cup boiling water
1 cup orange juice
⅓ cup instant nonfat dry milk
1 cup sliced peaches

Dissolve gelatin in boiling water; stir in orange juice. Chill to jelly-like consistency. Sprinkle on nonfat dry milk and beat until fluffy (will double in volume). Layer Orange Chiffon with sliced peaches in parfait glasses; or, fold in sliced peaches and spoon into dessert dishes. Chill before serving.

* * *

PEACHY SHAKE

2 cups chilled milk
1 cup chopped frozen or fresh peaches
2 large scoops vanilla ice cream

Mix milk, peaches and ice cream in a blender or an electric mixer until thick. Pour into 2 tall glasses and serve at once. NOTE: Try bananas or strawberries instead of peaches.

* * *

ICE CREAM SANDWICHES

½ cup corn syrup
½ cup peanut butter
3 cups rice cereal
1 pint brick ice cream

Blend corn syrup and pea-

nut butter thoroughly. Add rice cereal and stir until well coated. Press mixture evenly into bottom of greased 13 x 9-inch pan. Place in freezer or coldest part of refrigerator until firm. Cut into 12 3-inch squares and place a slice of ice cream between each 2 squares, pressing gently together. Serve at once or wrap in aluminum foil or moisture proof paper and store in freezer until needed. If smaller servings are desired, cut each sandwich into 2 bars.

* * *

ICE CREAM SURPRISE

½ cup corn syrup
½ cup peanut butter
3 cups rice cereal
1 quart vanilla ice cream, slightly softened
2 teaspoons butter or margarine
½ cup rice cereal
¼ cup chopped peanuts

Combine corn syrup and peanut butter, mixing thoroughly. Add rice cereal and stir until well coated. Press mixture evenly around sides and bottom of 9-inch pie pan. Place in freezer or coldest part of refrigerator until firm. Spread ice cream in pie shell.

For topping, melt butter in fry pan. Crush rice cereal slightly; add with peanuts to fry pan Cook, stirring slightly, until golden brown. Sprinkle over pie. Freeze until firm. Cut into wedges to serve.

* * *

DATE CHOCOLATE CHIP CAKE

¾ cup shortening
1-¼ cups boiling water
1 cup chopped dates
1 cup sugar
2 eggs
2 cups unsifted all-purpose flour
1 teaspoon soda
½ teaspoon salt
1 tablespoon cocoa

TOPPING:

¼ cup sugar
½ cup chopped nuts
6-ounce package semi-sweet chocolate pieces

Pour boiling water over dates in bowl. Cool. Cream shortening and sugar. Add eggs and beat well. Sift flour with soda, salt, and cocoa. Add to shortening mixture alternately with date mixture, adding the dry ingredients first and last. Pour batter into 13 x 9-½ x 2-inch pan (bottom rubbed with shortening). Sprinkle sugar, nuts, and chocolate pieces over batter. Bake in a moderate oven (350 degrees) 35 minutes.

* * *

GLORIFIED STRAWBERRY SAUCE

2 tablespoons cornstarch
½ cup sugar
1-⅔ cups (13 ½-ounce can) frozen pineapple chunks, thawed
½ cup sliced fresh strawberries
1 tablespoon butter
Few drops red food coloring
¼ teaspoon almond extract
1-½ cups sliced fresh strawberries

In saucepan combine cornstarch and sugar. Drain pineapple, reserving fruit. Add water to juice to make ¾ cup liquid; gradually stir diluted juice into cornstarch mixture. Add ½ cup fresh strawberries; cook, stirring constantly, until mixture thickens. Remove from heat; add butter, red food coloring and almond extract. Continue stirring until butter melts; add reserved pineapple and 1-½ cups strawberries. Chill; serve over vanilla ice cream.

Ladies, Have You Heard? . . .

By Jane Thurston

About Giving Plants

THURSTON

Plants are a nice gift this season . . . Why not make them last? Each plant needs full sun, cool temperature, to be out of drafts, and requires adequate, not excess, moisture. Place the plants in the brightest window of your house — usually south or southwest direction.

Flowering plants react better in temperatures of 60 degrees during the day and 50 degrees at night. Avoid drafts for this can cause excessive evaporation of water from the root system.

In watering the gift plant, don't let it get too soggy. Water until the soil is moist but throw away the extra drainage water in saucer. Remember these suggestions and your holiday plant will thrive well.

Cavity Free Teeth

Are your teeth really cavity-free? Only 40% of people with tooth decay are seeking treatment. Research has shown that small amounts of Flourine when added to a public water supply can decrease tooth decay by 65%

Flouridation is economical - cost of two dental fillings can be compared to one's share of flouridating the water for a lifetime.

What helps contribute to dental health? Teeth should be brushed after eating and regularly scheduled visits to the dentist are a must. Well balanced diet - fruit, vegetables, milk and meat - provide vitamins and minerals for strong teeth and gums.

WARM WEATHER BEVERAGE SUGGESTIONS

Demand for cool drinks goes up in warm weather and this is good for each person needs a good supply of fluid daily Keeping a lot of fruit and milk drinks on hand assures your family of getting the six or 8 glasses of fluid that they need daily

Stock up on ice cubes Freeze small bits of fruit in several trays of cubes, try maraschino cherries, raspberries, mint leaves, blueberries or pineapple chunks in cubes to give variety

Keep lots of fresh fruits juices or concentrates on hand Combinations of fruit juices like pineapple, lemon and cranberry or apricot nectar, orange and lemon juice are colorful as well as tasty Adding gingerale or carbonated water to fruit drinks adds a bit of zip It's best to add just as you serve or the carbonation will be gone and the drink will be flat

In making your own fresh lemon or orange ade a dozen lemons will give you a pint of juice For each glass of lemonade you'll need 2 or 3 tablespoons of juice Keep your own sugar syrup on hand for fruit ades and punches Just boil a cup of sugar with a cup of water for a few minutes Store covered in the refrigerator When you want to make fresh lemonade pour the syrup in to sweeten.

CRYSTAL CLEAR ICED TEA

Perhaps the "sunshine" method of tea making may come closest to guaranteeing a crystal clear tea You don't really need sunshine but it does take a few hours in a warm place to make the tea Start with a quart of cold soft water and add 5 teaspoons tea or 5 tea bags (Soft water and careful measuring are important) Cover and let the tea stand on the kitchen counter or the back porch for two or three hours This long time brewing doesn't seem to injure the tea flavor and you'll find it quite clear. Chill before serving

Instant tea is easy to make, too In each glass place one teaspoon of instant tea, pour in a small amount of hot water to disolve, then fill with ice cubes and water Adding a bit of lemon or juice clears tea somewhat

If you make tea by the usual double strength method (two teaspoons tea for a cup of water) you may want to try this trick. Try reheating cloudy tea, but not boiling it, then add a half cup boiling water for each quart of tea. This seems to clear up the tea.

Is milk really "mankind's most nearly perfect food," as is so often asserted by nutritionists, food chemists and educators? The statement is made because a sixth of the nation's food energy and 75 per cent of its calcium requirements come from dairy foods Milk products also are prime sources of vitamins — furnishing nearly half of the national intake of riboflavin, a fifth of the Vitamin A and significant quantities of thiamine and ascorbic acid.

The nation's dairy cow population set all-time production records last year Some 17,400 000 cows gave 125 5 billion pounds of milk, or 58,372,093,023 quarts Output per cow was 7,211 pounds or almost 3,354 quarts during the year.

Writing Analyst Entertains Farm Women 4

Each of the 40 members and guests at the recent meeting of Society of Farm Women 4 had a brief personal analysis of their handwriting and a personality picture painted by the guest speaker.

Mrs. Arminta Good, New Holland discussed ways in which handwriting analysis can be of value at the meeting in the home of Mrs Willis Reapsome, 89 Elizabeth St, Landisville

Mrs Harrison Nolt read the Biblical account of handwriting on the wall, and conducted devotions

Mrs Richard Lefever, niece of the hostess, and her daughter, Anne Lefever, played a duet for oboe and flute Mrs Lefever is a former member of Society 4. Roll call was answered by each woman who told how she got her name

Mrs Robert Herr, president, announced the following committees Mrs Carl Siegrist, chairman, Mrs Paul Metzger, Mrs Maud Mohler Mrs Lloyd Nolt and Mrs Norman Siegrist, program, Mr Paul Kauffman, chairman, Mrs Martin Geiger, Mrs Henry Hiestand and Mrs Daniel Will, special activities

A report was given on the part county farm women's societies play in the sucess of summer picnics held for Spanish-speaking migrants.

Reap profits—read the classified

Farm Women 5 Hear Review Of New Book

The book, "Syrian Yankee" was reviewed by Mrs Pat Snyder at a recent meeting of the Society of Farm Women 5 in the home of Mrs Harry Graybill, 5910 Main St, East Petersburg

Mrs Paul Ebersole led devotions Guests at the meeting were officers of the County Farm Women organization and state treasurer, Mrs Abner Risser.

The next meeting will be held at the home of Mrs Cora Earhart, Centerville at 1 30 p m no Saturday, September 29.

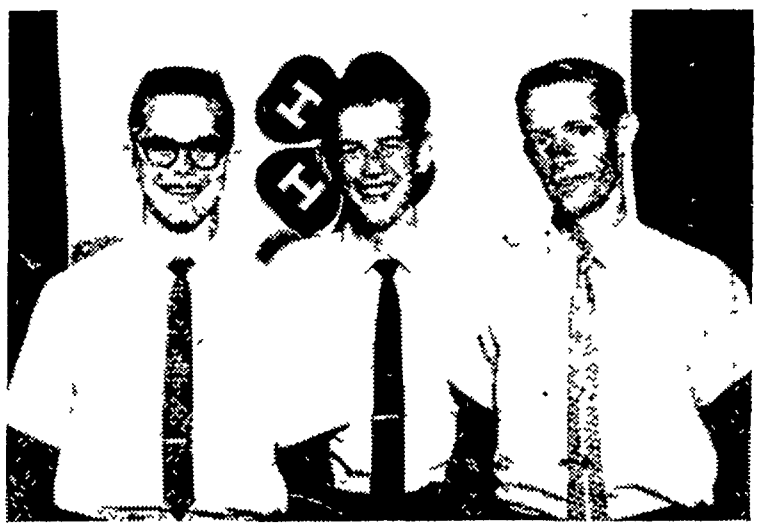
New Providence 4-H Club Visits Garden Spot

By Susie Atkins, Reporter

The New Providence 4-H Club accepted an invitation to a recent Garden Spot Club meeting at the Lampeter Fair Grounds The Kirkwood Club was also present

The business meeting was short and the visiting members and leaders introduced themselves The program was a series of slides which showed birds on their nests taken with telescopic lense.

After the program, a doggie roast completed the evening



LANCASTER COUNTY'S 4-H poultry judging team will represent the state in competition at the annual NEPPCO convention in Harrisburg in October. The team won first place in judging at State 4-H Days at the Pennsylvania State University. The team will receive a plaque, $50 from the Pennsylvania Poultry Federation and a $10 award from a poultry breeding farm Team members are (left to right): Robert Hoover, Denver; Kenneth Dombach, Manheim R2, and Mark Stoner, Eden Road, Lancaster.

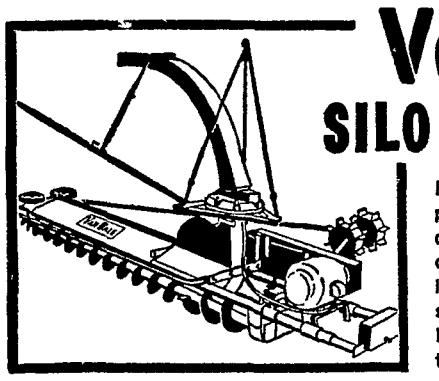
Complete automatic feeding for DAIRY COWS and CATTLE!

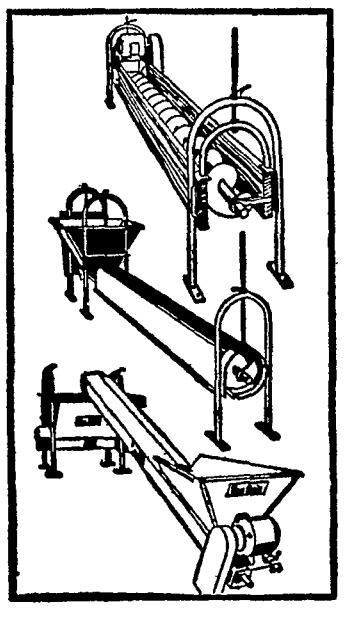
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

National Farmers Organization Orders All-Out Holding Action

The National Farmers Organization this week gave tumultuous approval to the proposal to withhold farm products from the market in an effort to boost the prices farmers receive

An estimated 20,000 people meeting in DesMoines, Iowa, on Tuesday passed the resolution by an overwhelming voice vote.

Members of the farm organization, one of the younger associations recognized nationwide, agreed to start the withholding action on hogs, cattle, sheep and grain at Midnight Friday.

One of the speakers at the meeting, Vince Rossiter, a banker from Hartington, Neb., said it was the greatest meeting of farmers ever held.

Purpose of the action is to force processors of farm produce to enter into production and price contracts with farmers through N F O The action is a stepped up version of a similar action last year when hogs and cattle were withheld from several markets in the corn belt Packers at that time disclaimed any change in buying, but N F O. members claimed a victory in better prices and changed attitudes of packer buyers.

Explosives

Keep them away from children. It may be safer to destroy the little that is left around than to run risk of children or animals getting to them before they are needed next season

CHECKERBOARD service bulletin

OLD 907's RECORD STILL STANDS

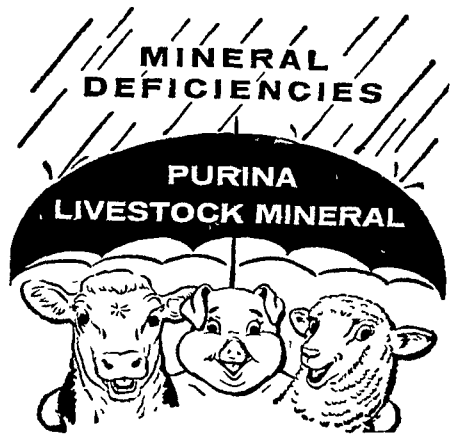
Thirty-four old cows in the Purina Farm Dairy Center herd have lifetime production records of more than 100,000 lbs. of milk. Cow number 907, pictured at right, had the best record of all. She produced 180,377 lbs. of milk in 11 lactations.

Through the years dairy animals, raised at the Farm the Purina Way from birth grow fast, freshen early and spend long, profitable years in the milking string.

Dairymen who follow the Purina Dairy Program get equally good results.

We urge you to try Purina, prove to yourself that Purina feeding costs you less.

Do You Know . . . . Livestock Mineral Is Cheap Insurance?



Purina Livestock Mineral is cheap insurance against mineral deficiencies. For just a few cents per head per year you can be sure livestock get the minerals needed to produce and reproduce efficiently.

Purina Livestock Mineral is now available in two easy-to-use forms — meal or blocks.

The meal form is ideal for free-choice feeding of feedlot cattle, hogs, and sheep. The weather resistant blocks are handy for use on range or pasture. Don't take chances with livestock health and profits — feed Purina Livestock Mineral . . . available at our Checkerboard store.

STOP FLIES COLD 5 WAYS

For most effective, economical fly protection, use a combination of Purina Fly Killers. Don't give flies a chance to light on buildings or animals, contaminate feed, spread disease germs. Fight them these 5 ways:

1. Spray or dust your livestock.
2. Apply a solution of Baytex Spray Concentrate or Purina Building Spray Powder on buildings.
3. Scatter Purina Fly Bait on the ground.
4. Use Purina Insecticide Mist inside barns.
5. Put Purina Fly Checkers wherever you find flies.

We have a full line of deadly Purina Fly Killers. Let us help you get a head start on your fly control program this summer right now. We're at the familiar Red and White Checkerboard Store.

Outgrown Shoes

Don't be tempted to hand down outgrown shoes to a younger child, cautions Mrs. Mae Barton, Penn State extension clothing specialist. Although outgrown shoes are often still good, no two pairs of feet are exactly alike. Once a shoe is molded to the foot, it won't change. If another child wears the shoe, his tender foot is apt to be twisted and turned to fit the shape of the shoe.

Most mirrors seem to have a very grumpy look, early of a morning.

● Dairy Show

(Continued from Page 1)

County teamed up to show the way in county group competition The four junior calves of Donald and Paul Trimble and Joyce Kreider all of Quarryville R1 and Phyllis Hoover Gap R1 beat out the contingent from York County

The best local exhibitors could do in the Jersey show was two third place ribbons in class competition and a fifth place in county groups The county was not represented in Milking Shorthorn competition

Judge Lee Yost Manager of Wyno Farms judging under a modified Danish system handed out five blue ribbons to Guernseys but only one to Brown Swiss and one to Ayrshire entrants from the county A blue ribbon in the district show is the 4-H'ers' ticket to the state junior dairy show in Harrisburg later this month

Judge Jack Fairchild official classifier of the Holstein Friesian Association of America put the blue ribbon on one Jersey heifer and six Holstein entries from the county

Following are county placings to fifth place

Brown Swiss

Junior Calf 1 Donald B Trimble, Quarryville R1; 2, Joyce Kreider Quarryville R1 3 Paul Trimble, Quarryville R1 4 Phyllis A Hoover Gap R1 5, Virginia Lee Hoover Gap R1

PERFORMANCE is the Key To Low Costs and Performance is what you'll get if you feed Early Bird Broiler Rations and combine them with Good Chicks and Good Management

Many growers use this combination and get consistently good results every time.

John Kohr of Fredericksburg, Pa. is a good example.

John's Latest Flock Showed the Following Results:

No. Chicks Placed 6-1-62	11,000
Average Age When Marketed	9 weeks, 2 days
Average Weight	3.81 lbs.
Lbs. of Feed Used per lb. Liveweight	2.04 lbs.
Liveability	100%
USDA - Condemnation	15 head

On August 13th we started delivery of our New Improved Broiler Rations designed to further lower your costs with better performance.

MAY WE SERVE YOU?
